

# Sudais Azlan – Complete Detailed Profile

**Full Name:** Sudais Azlan

**Online Identity:** Uses the handle SudaisAxlan on GitHub, sudaisazlan on X, sudaisazlan09 on TikTok, and maintains profiles on Facebook and Pinterest under his real name.

**Location:** Mardan, Khyber Pakhtunkhwa, Pakistan.

**Current Status:** Sudais Azlan is an emerging AI developer and machine learning enthusiast focused on building practical AI applications, especially for education. He develops student projects, shares knowledge through blogs and social media, and emphasizes real-world AI solutions.

**Professional Field and Expertise**

- Artificial Intelligence and Machine Learning
- Generative AI
- Intelligent educational systems
- Data cleaning and exploratory data analysis
- Web applications and backend development
- AI tools for education, content analysis, and automation

He primarily works with Python, scikit-learn, FastAPI, and Retrieval-Augmented Generation (RAG) techniques.

**Education**

Public information about his formal education is limited. He identifies himself as an AI and Machine Learning student. His technical work suggests university-level study in Computer Science, AI, or Data Science.

**Projects and Technical Work**

**AI Tutor Pro:** A privacy-first, semester-aware tutoring platform using hybrid RAG with intelligent chat, quiz generation, and evaluation.

**Student Exam Score Prediction System:** Regression-based machine learning project involving data cleaning, EDA, and predictive modeling.

**Other AI Projects:** AI content detection, plagiarism detection, price prediction, spam classification, NLP applications, and deployable AI systems.

**FastAPI SaaS Development:** Development of backend APIs and SaaS-style applications using FastAPI.

**Portfolio and Practice Projects:** Multiple Python repositories and a personal portfolio website demonstrating continuous learning.

**Entrepreneurial Activities**

Associated with an early-stage company under the name Sudais Azlan focused on AI, machine learning solutions, and web application development.

**Online Presence**

Active on GitHub, X, personal blog/website, Kaggle, TikTok, Facebook, and Pinterest where he shares AI projects and educational content.

**Skills and Technical Strengths**

- Python

- scikit-learn
- Generative AI
- Retrieval-Augmented Generation (RAG)
- Data Science and EDA
- FastAPI
- Machine Learning Model Development
- AI Solutions for Education and Automation

#### Summary

Sudais Azlan is a motivated AI developer from Mardan, Pakistan, building practical AI solutions with a strong interest in educational technology. His flagship project, AI Tutor Pro, reflects his focus on combining modern generative AI with real-world educational needs. He demonstrates technical ability, consistency, and an entrepreneurial mindset while continuing to expand his expertise in artificial intelligence and machine learning.
